

Technical Project Manager (m/f/d)

Location: Bergkirchen/ Unterschleißheim

Starting Date: at the earliest possible date

What we offer?

Veoneer develops cutting-edge technology for the Future Car. Our international, agile and highly collaborative teams aim to accelerate the growth in Autonomous Driving and be the leader in Advanced Driver Assistance Systems. We empower our people and are dedicated to their professional development and growth.

With 8000 employees in 13 countries, our growing team has the goal to lead the revolution underway in the automotive industry...and then be the pioneer for what comes next.

What you'll do?

- Manage one or more sub projects and team(s) interdisciplinary
- Plan and coordinate Veoneer project resources for the relevant ADAS/HAD sub project(s)
- Technical interface for the sub project(s) towards the System Project Manager
- Technical supervisor for the sub project members
- Manage system sub project execution according Veoneer standards in respective tools (model-based and document-based)
- Track sub project progress according Veoneer Processes
- Employ mitigation strategies for technical risks

What you'll bring

- University Degree in Computer Sciences, Mechanics, Industrial Engineering or similar
- Several years of experience in multi-site and multi-cultural projects with focus on ADAS/HAD systems
- Ability to plan and track autonomously in a matrix organization
- Excellent communication Skills, confident and competent appearance, strong analytical skills, power of persuasion, team spirit, organizational strength and moderating strength
- Experienced in the automotive industry (A-SPICE, etc.)
- Good knowledge in vehicle safety and electronics
- Good knowledge of system elements on vehicle level for ADAS features
