

Resident Engineer (m/w)

Holzgerlingen (Near Stuttgart)

(Job ID: 114657)

What we offer?

Veoneer develops cutting-edge technology for the Future Car. Our international, agile and highly collaborative teams aim to accelerate the growth in Autonomous Driving and be the leader in Advanced Driver Assistance Systems. We empower our people and are dedicated to their professional development and growth. With 8000 employees in 13 countries, our growing team has the goal to lead the revolution underway in the automotive industry... and then be the pioneer for what comes next.

What you'll do?

- Member of the project management team and representing the project team in front of the customer
- Ensuring customer on-site support for a specific product area
- Discuss and drive internal impact analysis (on design, development and test timing and costs) for active safety control units and sensors
- Understanding and surveying evolutions in customer processes and tools
- Ensures that internal processes, tools, project timing and scope of deliveries are matching
- Contributing with customer requirement and process knowledge to the high-level system design of the product
- Acting as customer interface for the project team
- Supporting and performing coding, flashing, reading out of electronic control units and maintenance of tools
- Providing high-level analysis of customer design issues
- Controlling and performing the problem resolution process in handling customer error reports
- Ensuring that system engineering and resident activities are performed according to respective processes
- Represent Veoneer at customer electronics departments for on-site support
- Support test team with system specific testing support and participate customer test campaigns

What you'll bring

- Bachelor or Master Degree in Electrical Engineering or similar
- 1-3 years of experience in automotive product development
- Good product and system knowledge
- Good requirements management knowledge
- Basic knowledge in hardware and software
- Team player with leadership skills and excellent communication skills
- Fluent German and English language skills
